Merlin Noise Control

For more than a decade MERLIN Noise Control has been a leader in delivering effective noise control solutions throughout Western Canada. With our integrated engineering, best-in-class products and services and unwavering commitment to delivering client excellence, we have been a partner-of-choice for today's leading organizations, creating a more peaceful and harmonious environment between industry and community.

Customer Centric Approach

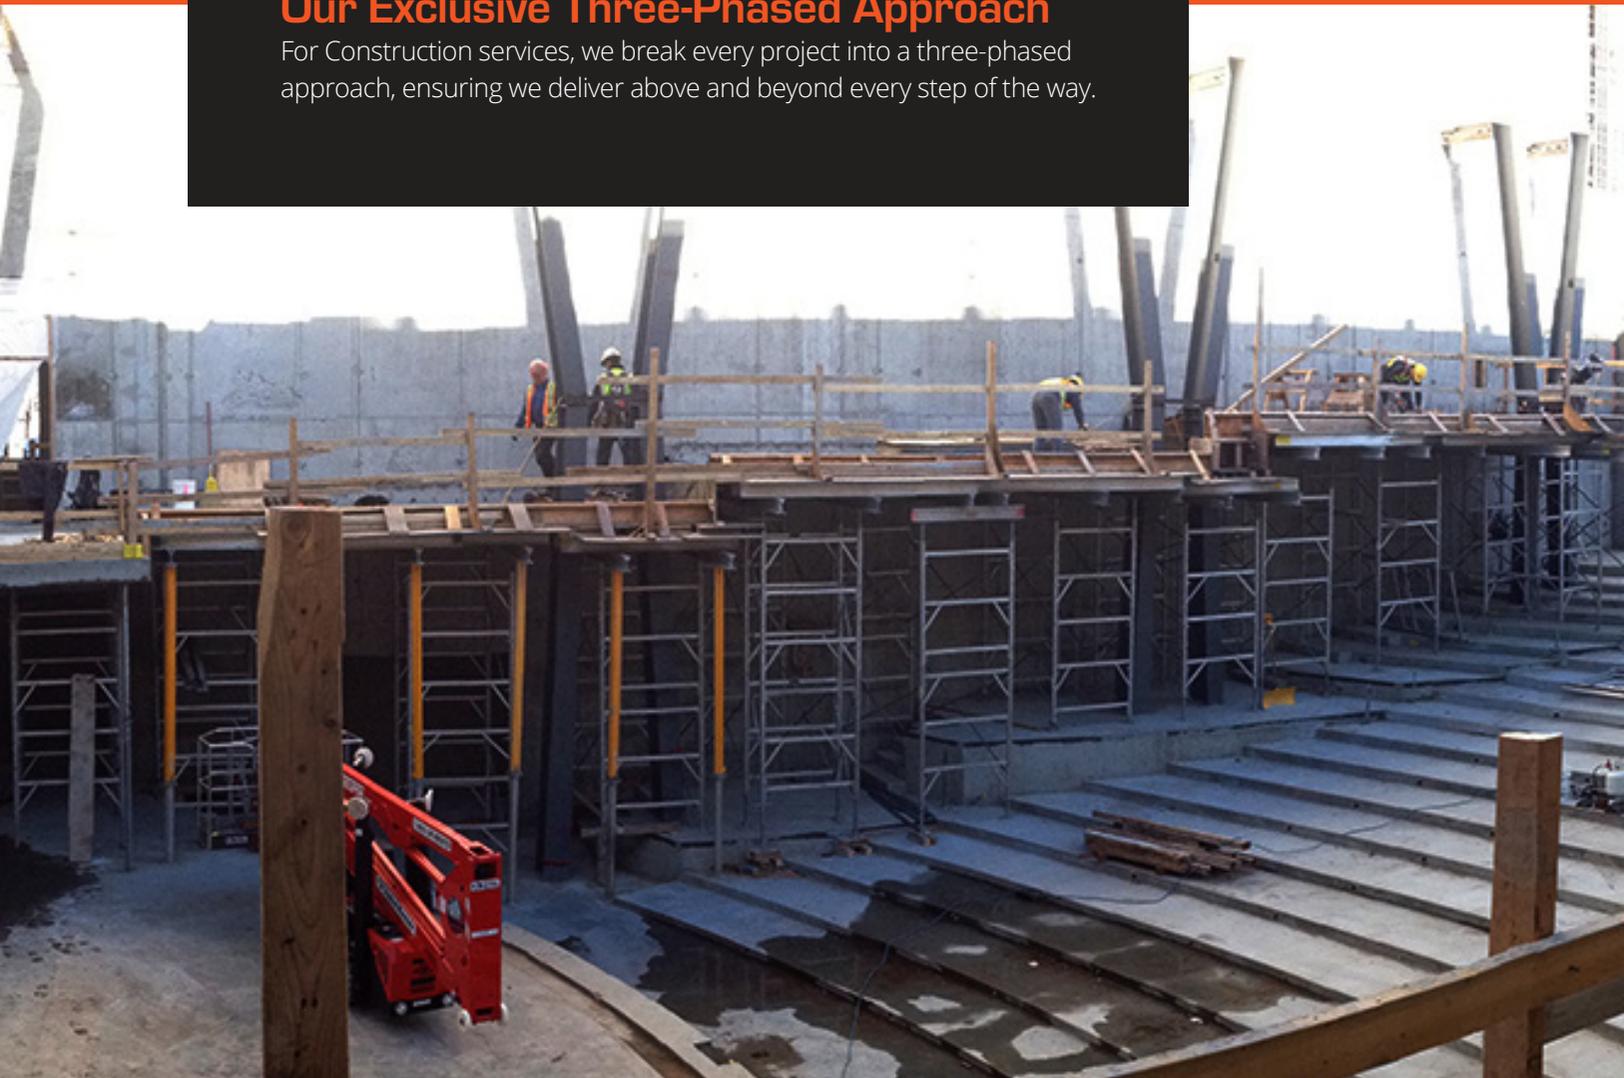

At MERLIN, our number one priority is delivering client excellence in everything we do. We know our long-standing reputation of being a leader in quality noise control is only as good as our last job, our last performance. That's why delivering above and beyond, and always surpassing client expectations isn't just a notion, it's at the core of everything we do. Putting you first, always.

Guaranteed Performance

At the heart of MERLIN is our unmatched performance guarantee. We stand behind what we make. Period. It's either done right or we will make it right. And that you can always count on.

Our Exclusive Three-Phased Approach

For Construction services, we break every project into a three-phased approach, ensuring we deliver above and beyond every step of the way.

Construction Services

Solid Solutions. Done Right.

MERLIN Construction Services is committed to building something better. Our highly experienced and disciplined team members are there from start to finish. With an impeccable safety record and proactive management approach, we lay the foundation for the overall success of your project ensuring it is completed on-time, on-budget and to the highest standards possible.

For Construction Services, we break every project down into our three-phased approach:

1. Pre-Construction

Effective preparation is essential to the successful execution of your project. We take the time to map out every detail, outlining and addressing any foreseeable challenges as well as coordinating all fundamentals associated with the project. Right from the onset we are properly prepared, so we can provide the most seamless experience possible.

2. Construction Execution

When it comes to execution, everything counts. It is that disciplined attention to detail we are most known for. No cutting corners, working within agreed upon timelines and budgets as well as always responsive and accountable so you can remain confident and are properly informed every step of the way. We work with the best to deliver the best results possible.

3. Post Construction

We know our reputation is only as good as our last engagement. That is why we take the time to do an in-depth post analysis of every construction project. Throughout our final review we look at every aspect of the project to ensure we have delivered and customer satisfaction is done right. If we see a situation, we correct it and won't sign off on a project until it is properly completed. That's what getting the job done right is all about.
