Merlin Noise Control

For more than a decade MERLIN Noise Control has been a leader in delivering effective noise control solutions throughout Western Canada. With our integrated engineering, best-in-class products and services and unwavering commitment to delivering client excellence, we have been a partner-of-choice for today's leading organizations, creating a safe and healthy workplace across all industries.

Customer Centric Approach

At MERLIN, our number one priority is delivering client excellence in everything we do. We know our long-standing reputation of being a leader in quality noise control is only as good as our last job, our last performance. That's why delivering above and beyond, and always surpassing client expectations isn't just a notion, it's at the core of everything we do. Putting you first, always.

Occupational Health & Safety.

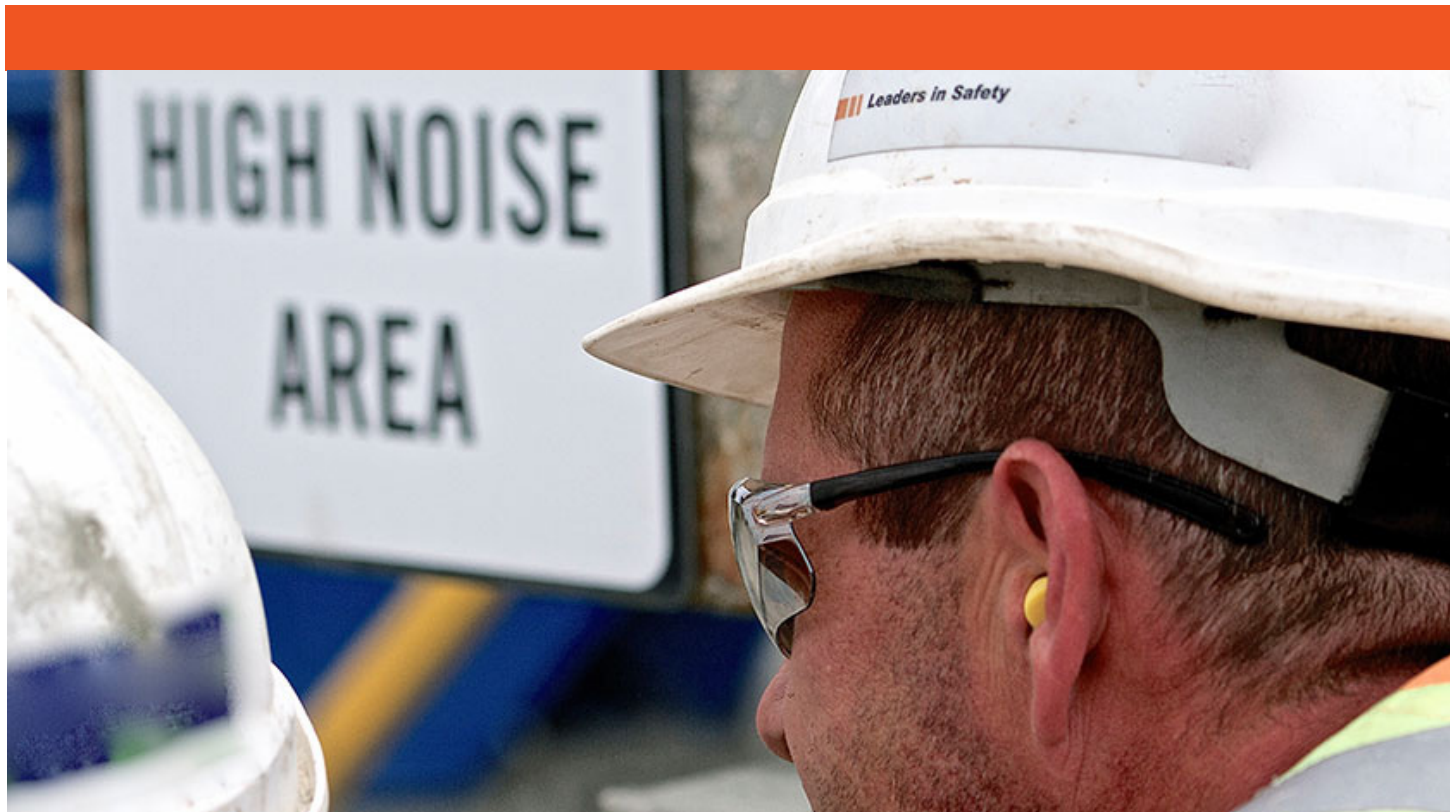

Impactful Solutions. Done Right.

Noise is one of the most common workplace hazards. Workers in many industries and occupations throughout Western Canada are exposed to noise levels that are so high that their hearing can be damaged. Because of these risks, employers are responsible for minimizing the noise hazard at their workplaces and must comply with different province's Occupational Health and Safety (OHS) legislation.

At MERLIN, health and safety is always our number one priority. That is why we have been working alongside industry to create a more productive and safe work environment for all. Through prevention, training and compliance, we design the foundation that provides peace of mind while adhering to the highest level of health and safety standards.

The following are different areas MERLIN can assist you in developing an effective Noise Management program for your workplace:

- Occupational Health and Safety Programs
- Identification of Noise Sources
- Engineering of Practical Noise Control Solutions
- Staff and Management Training
- Annual Reviews and Updates

Occupational Health & Safety (OHS) Compliance Programs

Through our extensive experience with noise and its effect on employees as well as our comprehensive understanding of different province's noise legislation, MERLIN can work with you to develop cost-effective compliance programs that go above and beyond industry standards and ensure that your organization and team members are well protected from noise related issues.

Noise Surveys of Facilities

At MERLIN we work with trusted consultants to conduct an in-depth analysis of your facility and identify different noise sources that are problematic to the health and safety of your team members.

Annual Review & Update

MERLIN has developed effective tools to assist in educating employees and employers about noise levels, the impacts they can have on an individual, effective workplace processes and how employees and employers.

Merlin is experienced in reviewing and auditing the effectiveness of your hearing conservation program. This includes the evaluation of hearing tests, noise control measures, any changes to the facility and potential need for further testing or training.

Identification and Correction of Noise Sources

Upon completion of this review, once hazardous noise levels are properly identified, we can recommend effective noise control solutions that will make your work environment safer and compliant with provincial legislation. These cost-effective solutions can include:

- Eliminating or Substituting the Noise Hazard
- Use Engineering Noise Control to Reduce the Exposure Noise Levels
- Implement Administrative Controls to reduce the Exposure Time for Operators
- Assess the Most Appropriate PPE (Earplugs and or Earmuffs) for Individual Operators

Staff & Management Training

MERLIN has developed effective tools to assist in educating employees and employers about noise levels, the impacts they can have on an individual, effective workplace processes and how employees and employers can better protect themselves. These tools include presentations, policies and signage to create a more knowledgeable environment.

Setting a Higher Standard

By creating a comprehensive Occupational Health and Safety Program you can ensure a more productive and efficient environment while minimizing risk to your most important asset, your valued employees. With the right measurements and tools in place combined with effective training of management and staff, studies have shown a dramatic decrease in workplace incidents resulting in less downtime of operations and an increase in morale and more disciplined approach by team members.

At MERLIN we are committed to fostering an environment that delivers on organizational values. To set a higher standard that is rewarding for both companies and team members. An environment that ensures health and safety is a priority so your business can perform optimally at all levels. That is our commitment and we will never lose sight of that.

Credentials

As a recognized leader and professional engineering firm (registered in the provinces of Alberta and BC), we proudly adhere to all regulations and guidelines to ensure the highest value in deliverables. That is why we are proud of our memberships with provincial bodies, national associations and international operations.

MERLIN is a member of APEGA

The Association of Professional Engineers and Geoscientists of Alberta (APEGA) regulates the practices of engineering and geoscience in Alberta on behalf of the Government of Alberta through the Engineering and Geoscience Professions Act.

MERLIN is a member of EGBC

The Association of Professional Engineers and Geoscientists of British Columbia is the regulatory and licensing body for Professional Engineers and Geoscientists in the Province of British Columbia, Canada.

MERLIN has an exception ranking with ISNetworld

ISNetworld is an online contractor and supplier management platform of data-driven products and services that help manage risk and strengthen relationships. To qualify, members have to undergo a rigorous qualification process and are routinely monitored.

MERLIN is approved and featured with Avetta

Through Avetta's contractor management services and prequalification services, they have built up an extensive network of pre-vetted supply chain partners to match to customer needs – ensuring qualifications, experience, workforce and certifications.
