

BUILDING SOMETHING BETTER

BUILDINGS, ENCLOSURES AND BARRIERS

CONNECTING YOU TO A BETTER WAY

ENERGYLINK
INTERNATIONAL

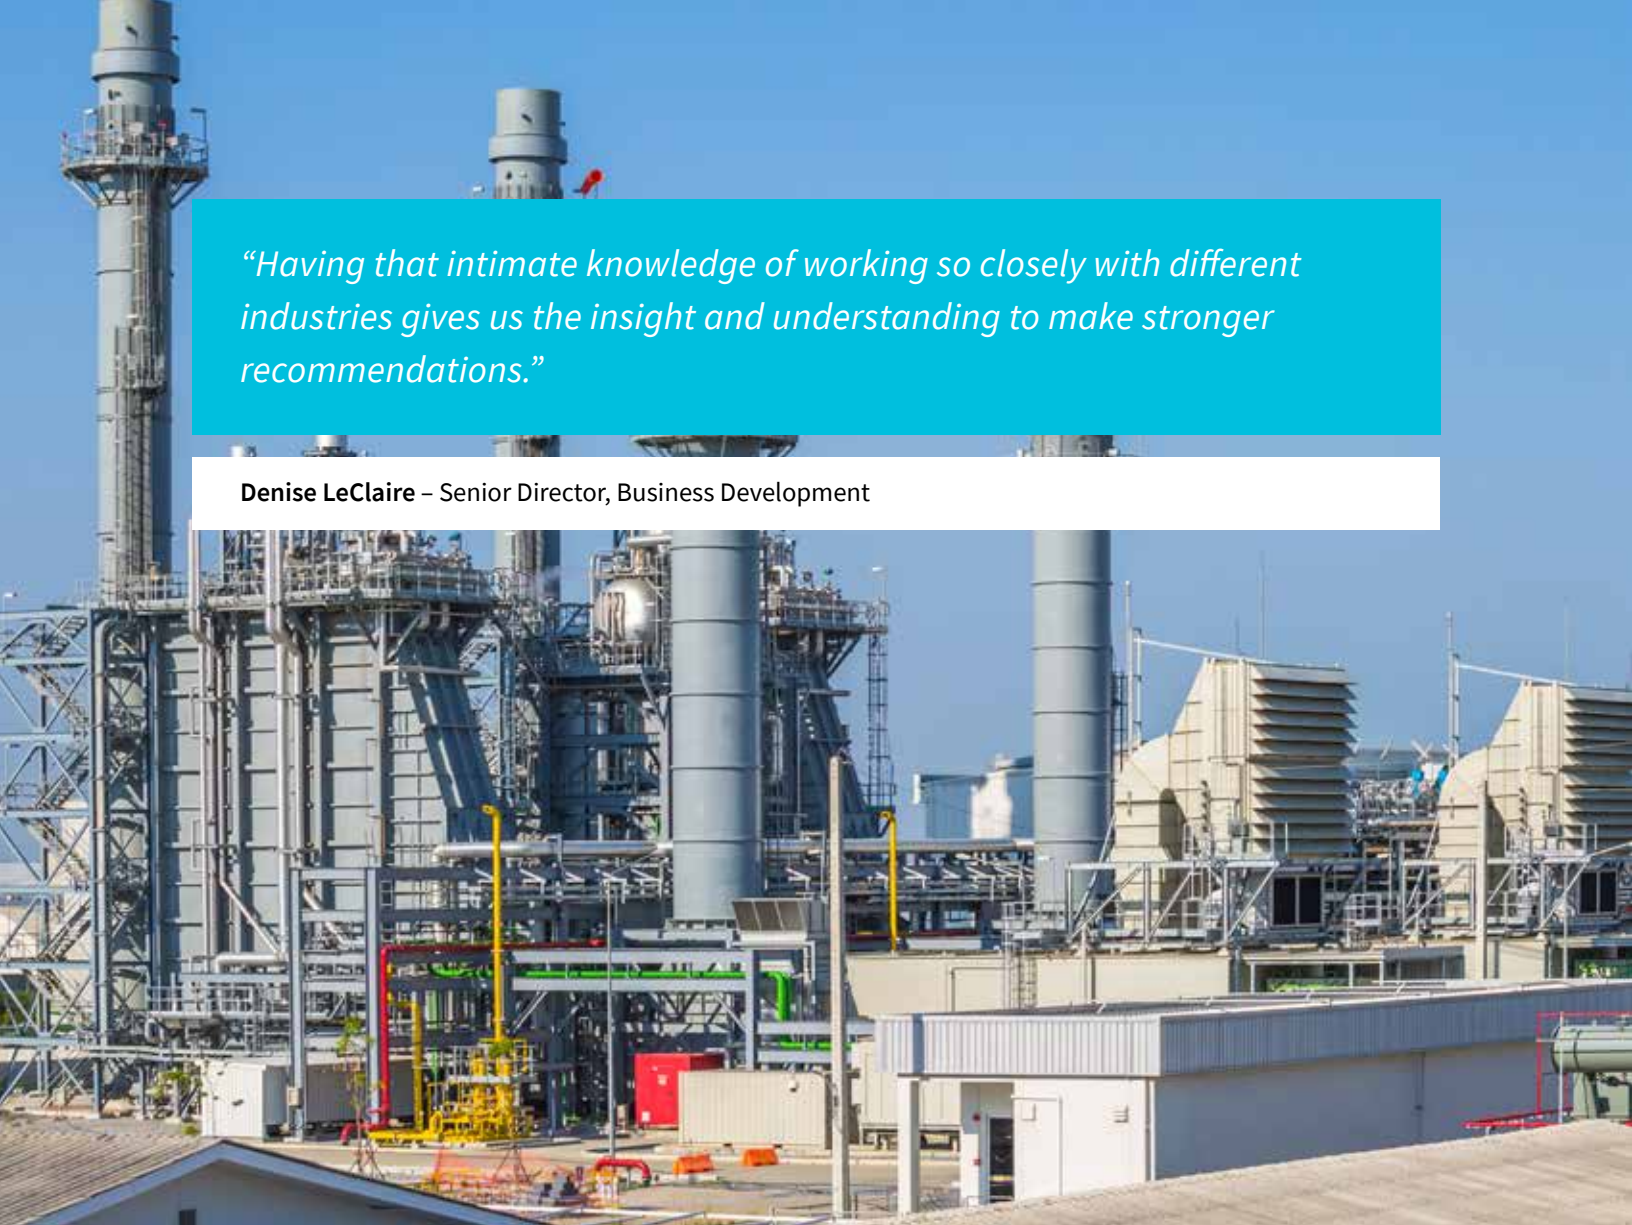

“Through innovation, experience and a strong commitment to surpassing client expectations, we continue to set the highest standards for buildings, enclosures and barriers.”

Harry Wong – President and CEO

YOUR TRUSTED PARTNER FOR EPC COMPANIES

Being a Partner of Choice is the foundation EnergyLink International has been built upon. For today's leading EPC companies, we are a preferred partner for site-wide turnkey buildings, enclosures and barriers because we put you first. We know our valued client's reputation is supported by our reputation. An earned reputation for delivering quality, performance and value. This is a trust that is never taken for granted and is why we continuously go above and beyond to deliver more – providing a dependable and seamless experience that is synonymous with the EnergyLink International name.

“Having that intimate knowledge of working so closely with different industries gives us the insight and understanding to make stronger recommendations.”

Denise LeClaire – Senior Director, Business Development

MARKET EXPERTISE

Whether you're looking for sound solutions or structures that will stand the test of time, the EnergyLink International team has designed, manufactured and constructed the most advanced solutions in buildings, barriers and enclosures across a variety of industries around the world, including:

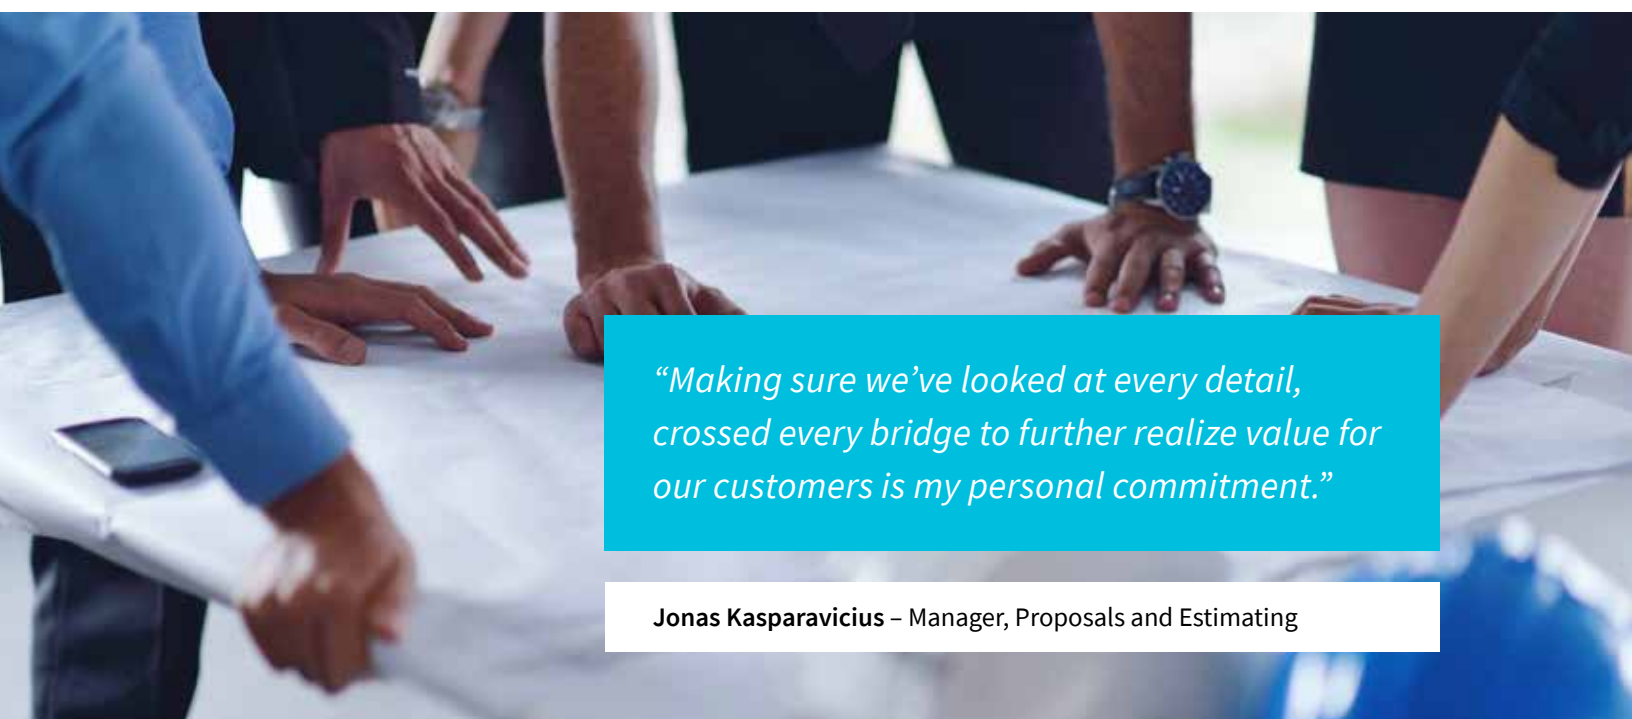

- Electric Power Generation
- Gas Turbine Power Plants
- Natural Gas Processing
- LNG Liquefaction
- Mining
- Drilling
- Petrochemical
- Refineries
- Oilsands
- Industrial Plants

ADDING VALUE THROUGHOUT EVERY STAGE

When we say partner, we mean it. Not only are we committed to delivering the best solutions possible, we look at every aspect of the project to provide optimum value for our customers. Whether it is with greater efficiencies, uncompromised expertise, dependable hands-on experience or through strategic and insightful negotiations so we can pass on much lower costs, the value we deliver is broad and far reaching and will continue to push us to deliver even more.

For buildings, enclosures and barriers, the following is a sample of the value-added solutions we have provided EPC companies:

- Our expansive network and experienced team ensure cost competitiveness with a variety of low-cost suppliers of structural steel, acoustic panels, silencers, HVAC systems, ventilation silencers and more
- Extensive experience and technical expertise of acoustic mitigation optimization ensures lower costs averaging 25 – 40% less than our competitors
- Demonstrated experience working with clients in the most congested work sites
- Single point of contact to coordinate steel, panel, HVAC and other system installations on the building envelope
- Unparalleled acoustic guarantee eliminates risk and ensures job is done to your specific standards
- Expansive network of trusted suppliers, long-term relationships and extensive insight from our team ensures strong support for estimating and bidding
- We carve out risk for our EPC clients

“Making sure we’ve looked at every detail, crossed every bridge to further realize value for our customers is my personal commitment.”

Jonas Kasparavicius – Manager, Proposals and Estimating

A RESPECTED LEADER

At the core of EnergyLink International is a team of highly respected professionals in buildings and noise management solutions with a variety of disciplines. Recognized leaders who are at the forefront of our ever-changing industries and backed by a diverse portfolio of hands-on domestic and international experience. Further strengthening our team is their strong commitment to going further and achieving more for our valued clients. The following showcases our combined experience and demonstrated technical expertise in solving complex challenges with value-added solutions.

- Our team has more than 300 overall plantwide acoustic guarantees and have achieved a 100% success rate
- Leading experts in treatment of low frequency noise, tonal, octave band guarantees and atmospheric/meteorological propagation effects
- Direct experience with even the most stringent acoustic wall assembly designs up to STC 68

“Leading by example through every action and discipline is what defines EnergyLink International and keeps us moving forward.”

Mike Waugh – Manager, Construction

REGULATORY CONSULTING

One significant advantage EnergyLink International’s team brings to the table is our international regulatory expertise. By getting involved at the permitting stage, we can verify all environmental requirements are met during planning and design – eliminating costly mistakes and oversights that can send you back to the drawing board.

BUILDING SOLUTIONS

The sky is the limit on what we can achieve together. From state-of-the-art design, extensive construction experience and a portfolio of proprietary acoustical and non-acoustical assemblies, our team's first-hand experience and extensive portfolio of small, mid and large-scale buildings continues to set us apart. This combined with our vast network of pre-qualified low-cost country manufacturing facilities ensures we can design and fabricate essential building systems everywhere you are more efficiently. This includes conventional steel structure, pre-engineered steel and hybrid structures of conventional and pre-engineered steel, ventilation and acoustical walls. Delivering more with every project continues to strengthen EnergyLink International's position as partner-of-choice for today's leading EPC companies.

Our multi-disciplinary teams of leading experts cover the full scope of building supply, including:

- Acoustic in-situ or panelized assemblies
- Building steel structures (conventional, hybrid and pre-engineered)
- Overhead cranes, jib cranes and monorails
- Mechanical heating, ventilation and air conditioning systems (including silencers)
- Electrical distribution and lighting
- Elevators
- Emergency power systems
- Fire suppression and detection systems
- Lighting protection systems
- Masonry and foundations
- Acoustic and conventional doors, windows, frames and hardware
- Acoustic and conventional overhead doors
- Acoustic and non-acoustic windows
- Mezzanines and platforms

“It’s not about managing expectations; it’s about surpassing them each and every time.”

Derek Wallace – Director, Projects

“Right down to the smallest detail, we have to ensure excellence, because we know we’re only as good as our last project.”

Ken Thompson –
Director, Manufacturing

TURNKEY BUILDINGS

Leave the complexities to us. EnergyLink International has extensive experience in creating turnkey buildings for a variety of industries and applications. Our extensive team has the disciplines, experience and knowledge to build a turnkey solution for your unique situation. Right from the start, EnergyLink International’s engineering and design professionals collaborate with your team to offer fully integrated services, including: Civil, Structural, Mechanical, Electrical, Acoustical, Instrumentation & Controls. We then integrate our network of trusted suppliers to ensure overall efficiencies and solid manufactured deliverables. And finally we are on the ground throughout the entire construction process, creating a safe and productive environment while achieving optimal performance levels to ensure your building is completed on-time and on-budget.

Add-On for Our Total Acoustic Building Solution

Our optimization of a building’s noise attenuation balances the cost of the acoustical wall and roof assemblies with ventilation and other silencing measures, to deliver the most advanced acoustical technology in the most cost-effective manner. Our unique portfolio of proprietary acoustical walls and roof assemblies can be used in conjunction with other silencing and building products and services for guaranteed results.

With EnergyLink’s complete suite of acoustic products:

- Acoustic walls/roof;
- Ventilation silencers
- Stack exhaust silencing
- Filterhouse silencing
- Enclosure silencing

EnergyLink International is able to balance the acoustic design while minimizing overall acoustic mitigation costs to meet far field noise criteria.

NOISE BARRIERS

EnergyLink International provides sound protection with high-performing barrier walls that are specifically designed for maximum noise mitigation with some of the best Noise Reduction Coefficient (NRC) and Sound Transmission Class (STC) ratings in the industry. Our team has been directly involved with achieving the most stringent acoustic wall assembly designs registering up to STC 68. With leading edge technology that includes sound-absorbing and sound-blocking materials in a variety of options, we offer design support, manufacturing and installation of customized industrial-grade metal sound barriers to meet your specific needs.

- Complete range of sound transmission and absorption performance
- Stand alone or fixed applications
- Innovative design composed of sound absorbing / blocking materials and durable surface options
- Powder coated or galvanized metal surfaces
- In-factory or on-site painting capabilities with customized colour selection
- Acoustic barrier panels also available ranging from 5' to 24' long and 3' to 4' wide

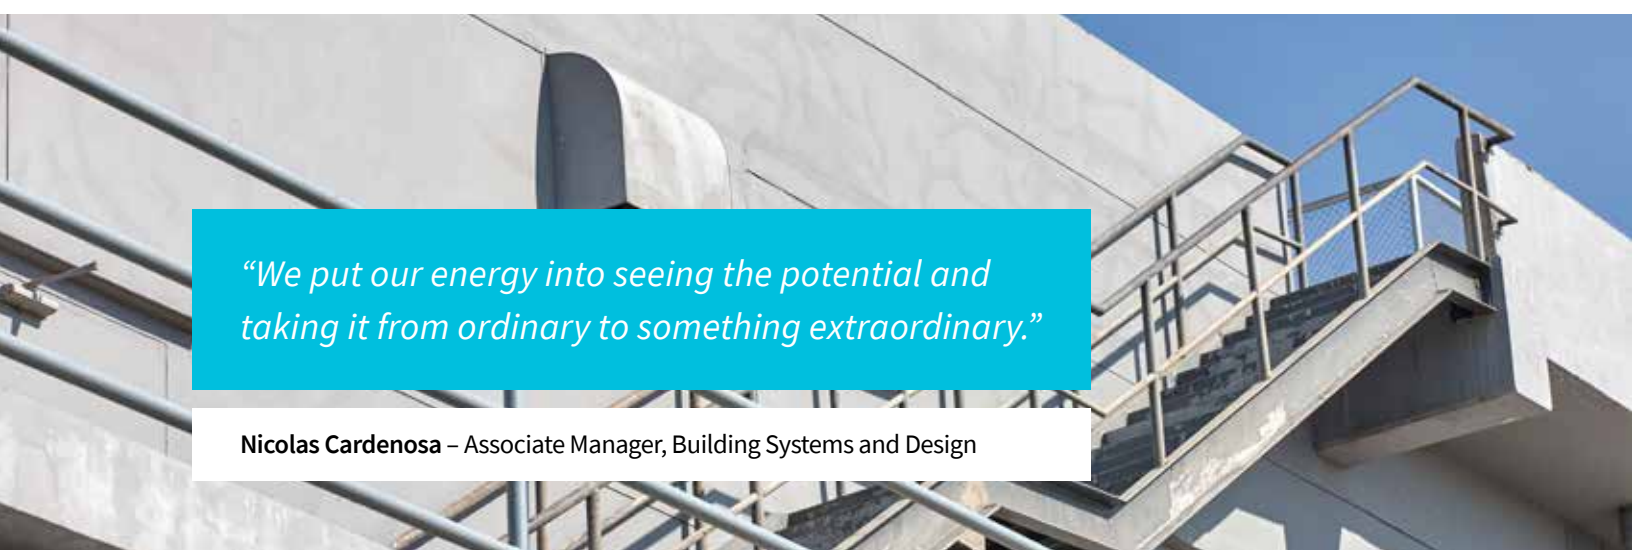

“My number one priority has always been to challenge the norm. Keep pushing further so we can ensure our customers are always at the forefront in sound solutions.”

Chris Giesbrecht –
Senior Manager, Engineering

ACOUSTIC ENCLOSURES

The leading cause of excess noise at facilities comes from equipment that is essential to your operations. At EnergyLink International, we understand the importance of your overall operations and that is why we are at the forefront in developing innovative solutions for acoustic enclosures. Technically designed to maximize sound reduction and meet the most stringent noise regulations, our customized enclosures go above and beyond to create a safe environment for all. Our team is highly experienced in developing sound enclosure solutions for a wide range of industries and equipment that includes pump stations, compressor stations, screw and reciprocating pumping, power generation and utilities as well as gas turbines.

“We put our energy into seeing the potential and taking it from ordinary to something extraordinary.”

Nicolas Cardenosa – Associate Manager, Building Systems and Design

ADD-ON PRODUCTS

At EnergyLink International, we want to ensure your power plant, gas compression and processing equipment needs are completely covered right from the start. Add-on from our comprehensive list of products and services for a complete system solution.

- Air filtration
- Ladders & platforms
- Foundations
- Cranes
- Cooler silencers
- Inlet & exhaust systems
- Catalyst systems for CO and NOx removal
- Silenced ventilation and ducting
- Acoustic equipment and personnel doors
- Acoustic windows or viewing panes
- Removable acoustic panels
- Electrical & lighting
- Fire & gas detection and suppression
- All trim, screws and caulking

“It’s knowing our customers count on us every step of the way, and always delivering on that expectation.”

Jim Johnson – Director, Quality

FULL SERVICE SOLUTIONS

At EnergyLink International, our full-service solutions are designed to further compliment the expertise of leading EPC companies and are an extension of your services – adding strength, flexibility and overall convenience to projects you are involved with.

Turnkey - With a team of leading professionals, we can provide turnkey services that include detailed acoustic modelling in 3D, design, foundation loads and regulatory analysis

Procurement – Our expansive network of qualified, low cost country fabricators ensures EnergyLink International can provide global fabrication support for our clients. We perform to the highest quality and standards with all required certifications.

Project Management – The EnergyLink Project Management team works on your behalf to ensure your project is delivered on-schedule and on-budget, as promised. They see to it that regulatory approvals are in place and that all components are designed, manufactured and installed to specifications and schedule.

Construction – Delivery and installation of acoustic cladding, acoustic panels, electrical, HVAC systems, ventilation silencers, lighting, lightning protection, flashings and gutters, ladders and platforms, doorways, louvers, vents equipment doors, windows, acoustic lagging, fire protection, gas detection, structural steel, overhead cranes, as well as post construction measurements and support.

Beyond – As a recognized leader in air and noise emissions mitigation, our extensive suite of products and services extends beyond buildings, enclosures and barriers. We are also a turnkey supplier of gas turbine intake and exhaust systems, silencers, filterhouses, catalyst systems, anti-icing systems and complete retrofit services.

CONNECTING YOU TO A BETTER WAY

EnergyLink International is a leading supplier of specialized and balanced solutions for air and noise emissions control, building design and construction, acoustic control engineering services, mitigation and gas turbine auxiliary systems. Backed by more than 25 years of ingenuity and a strong commitment to customer excellence we have an unwavering focus for developing leading-edge technologies, environmental advancements, superior construction and quality manufacturing through our team of dedicated professionals who ensure our customers are well positioned for both today and the future.
